

Re:

Sourcing wood material from across the UK and Europe:
From mills, factories, country homes, city apartments and farm houses.

R E : W O R K I N G

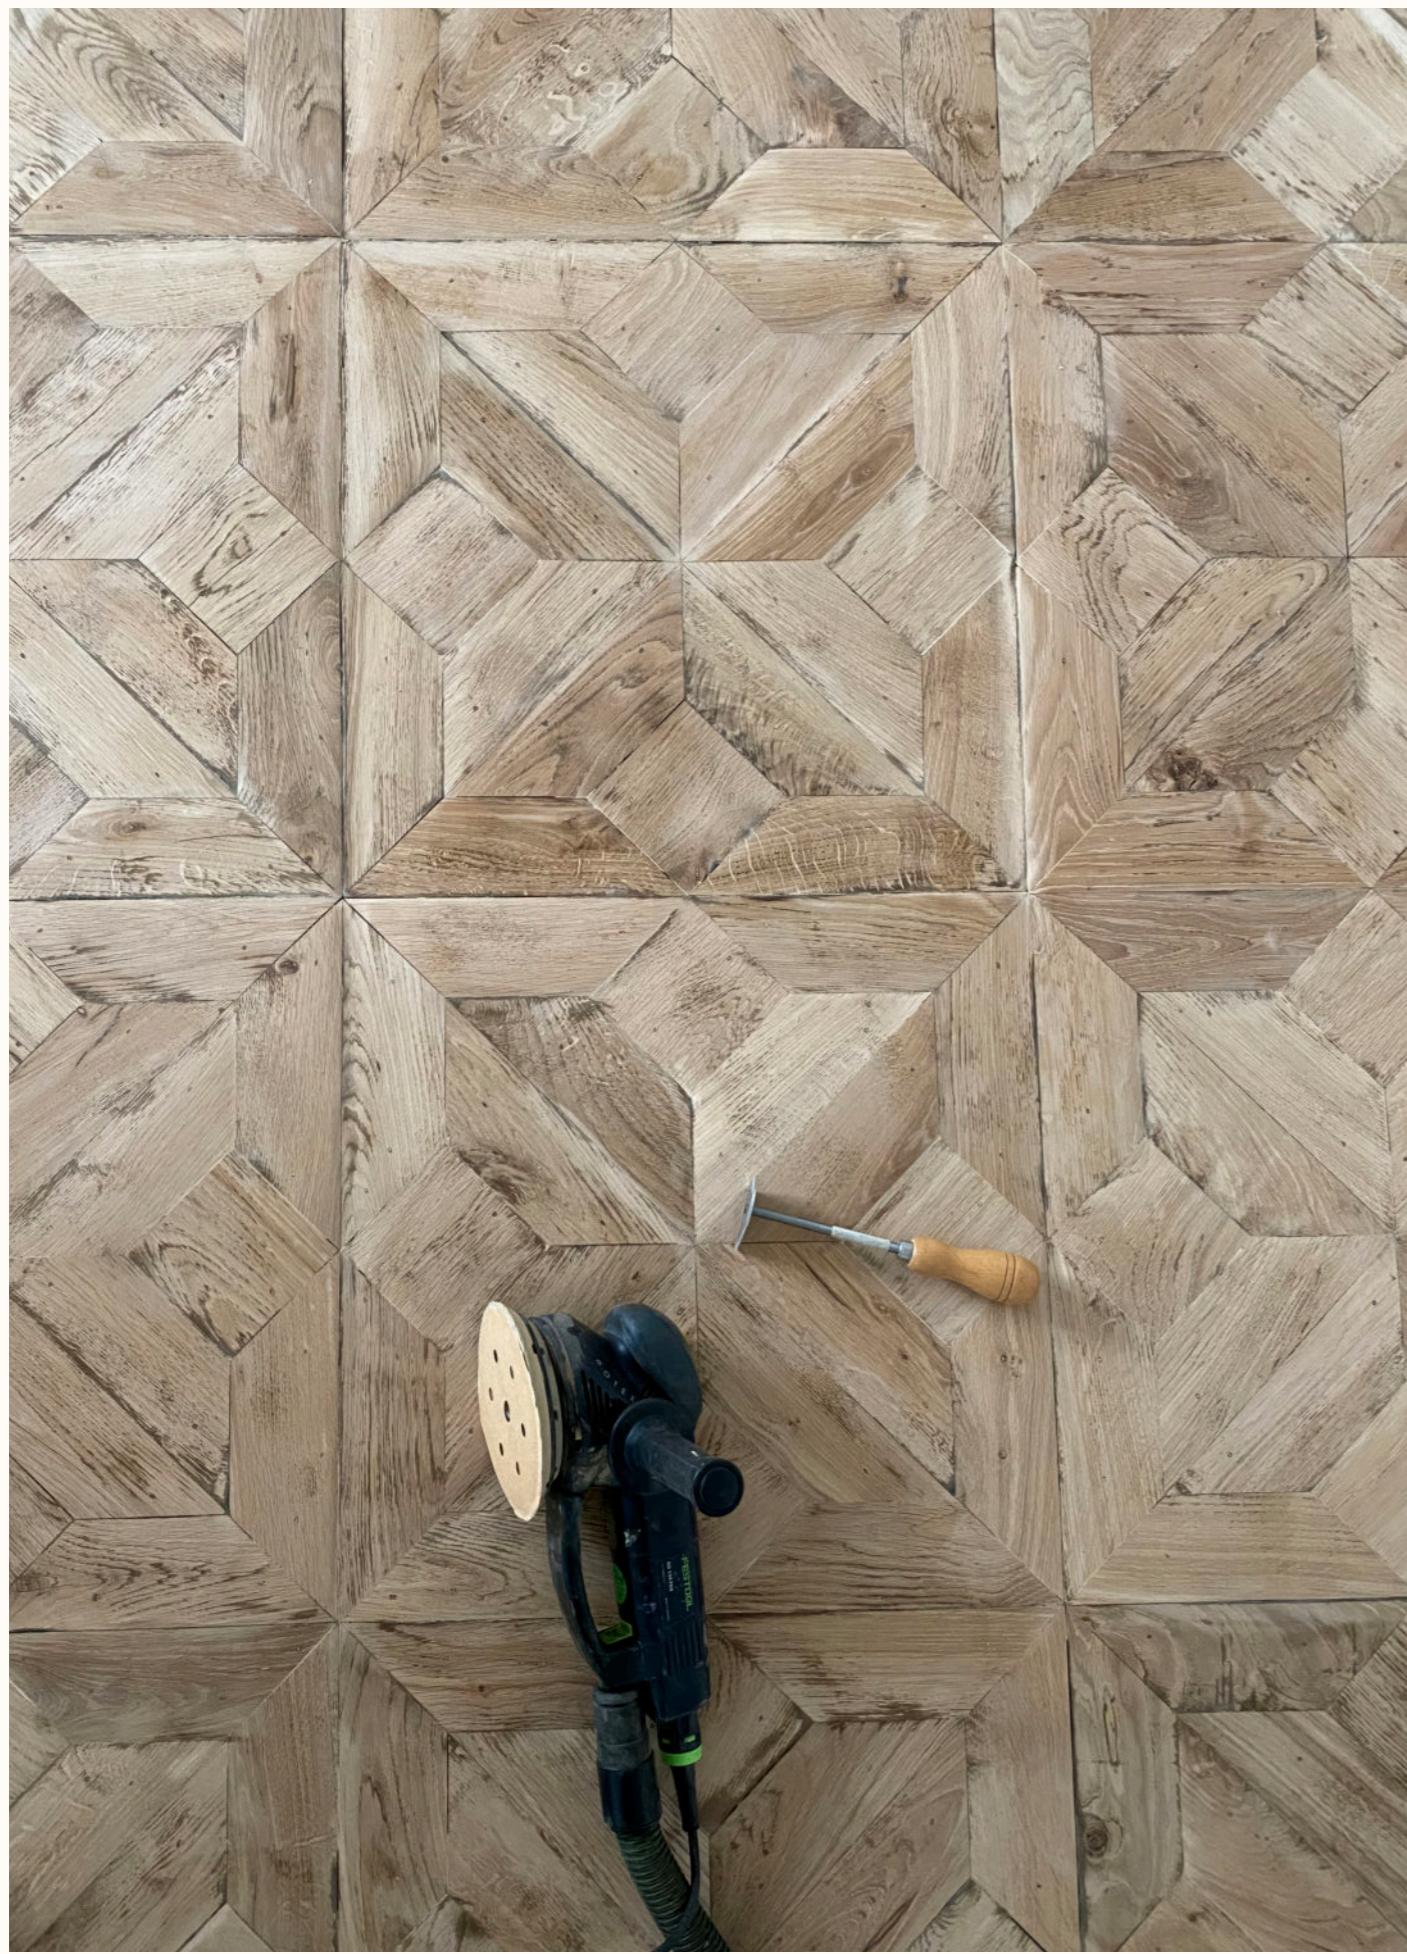

Naturally this timber is from a pool of diminishing resources and requires painstaking work to revive and restore the original patina. All of our timber is meticulously graded and re-machined for ease of installation.

R E : P U R P O S I N G

R E C L A I M E D W O O D

Shaped by time more than by hand, our reclaimed wood is
a pure expression of history and luxury.

NEW — SOLID WOOD

Our collection spans both contemporary and classical designs,
compressing centuries of character into new wood material.

R E : F L E C T

Our organic formulas are designed to react with the tannin acid that exists naturally within the timber, allowing us to create a time capsule effect that speeds up the natural ageing process.

NEW — ENGINEERED WOOD

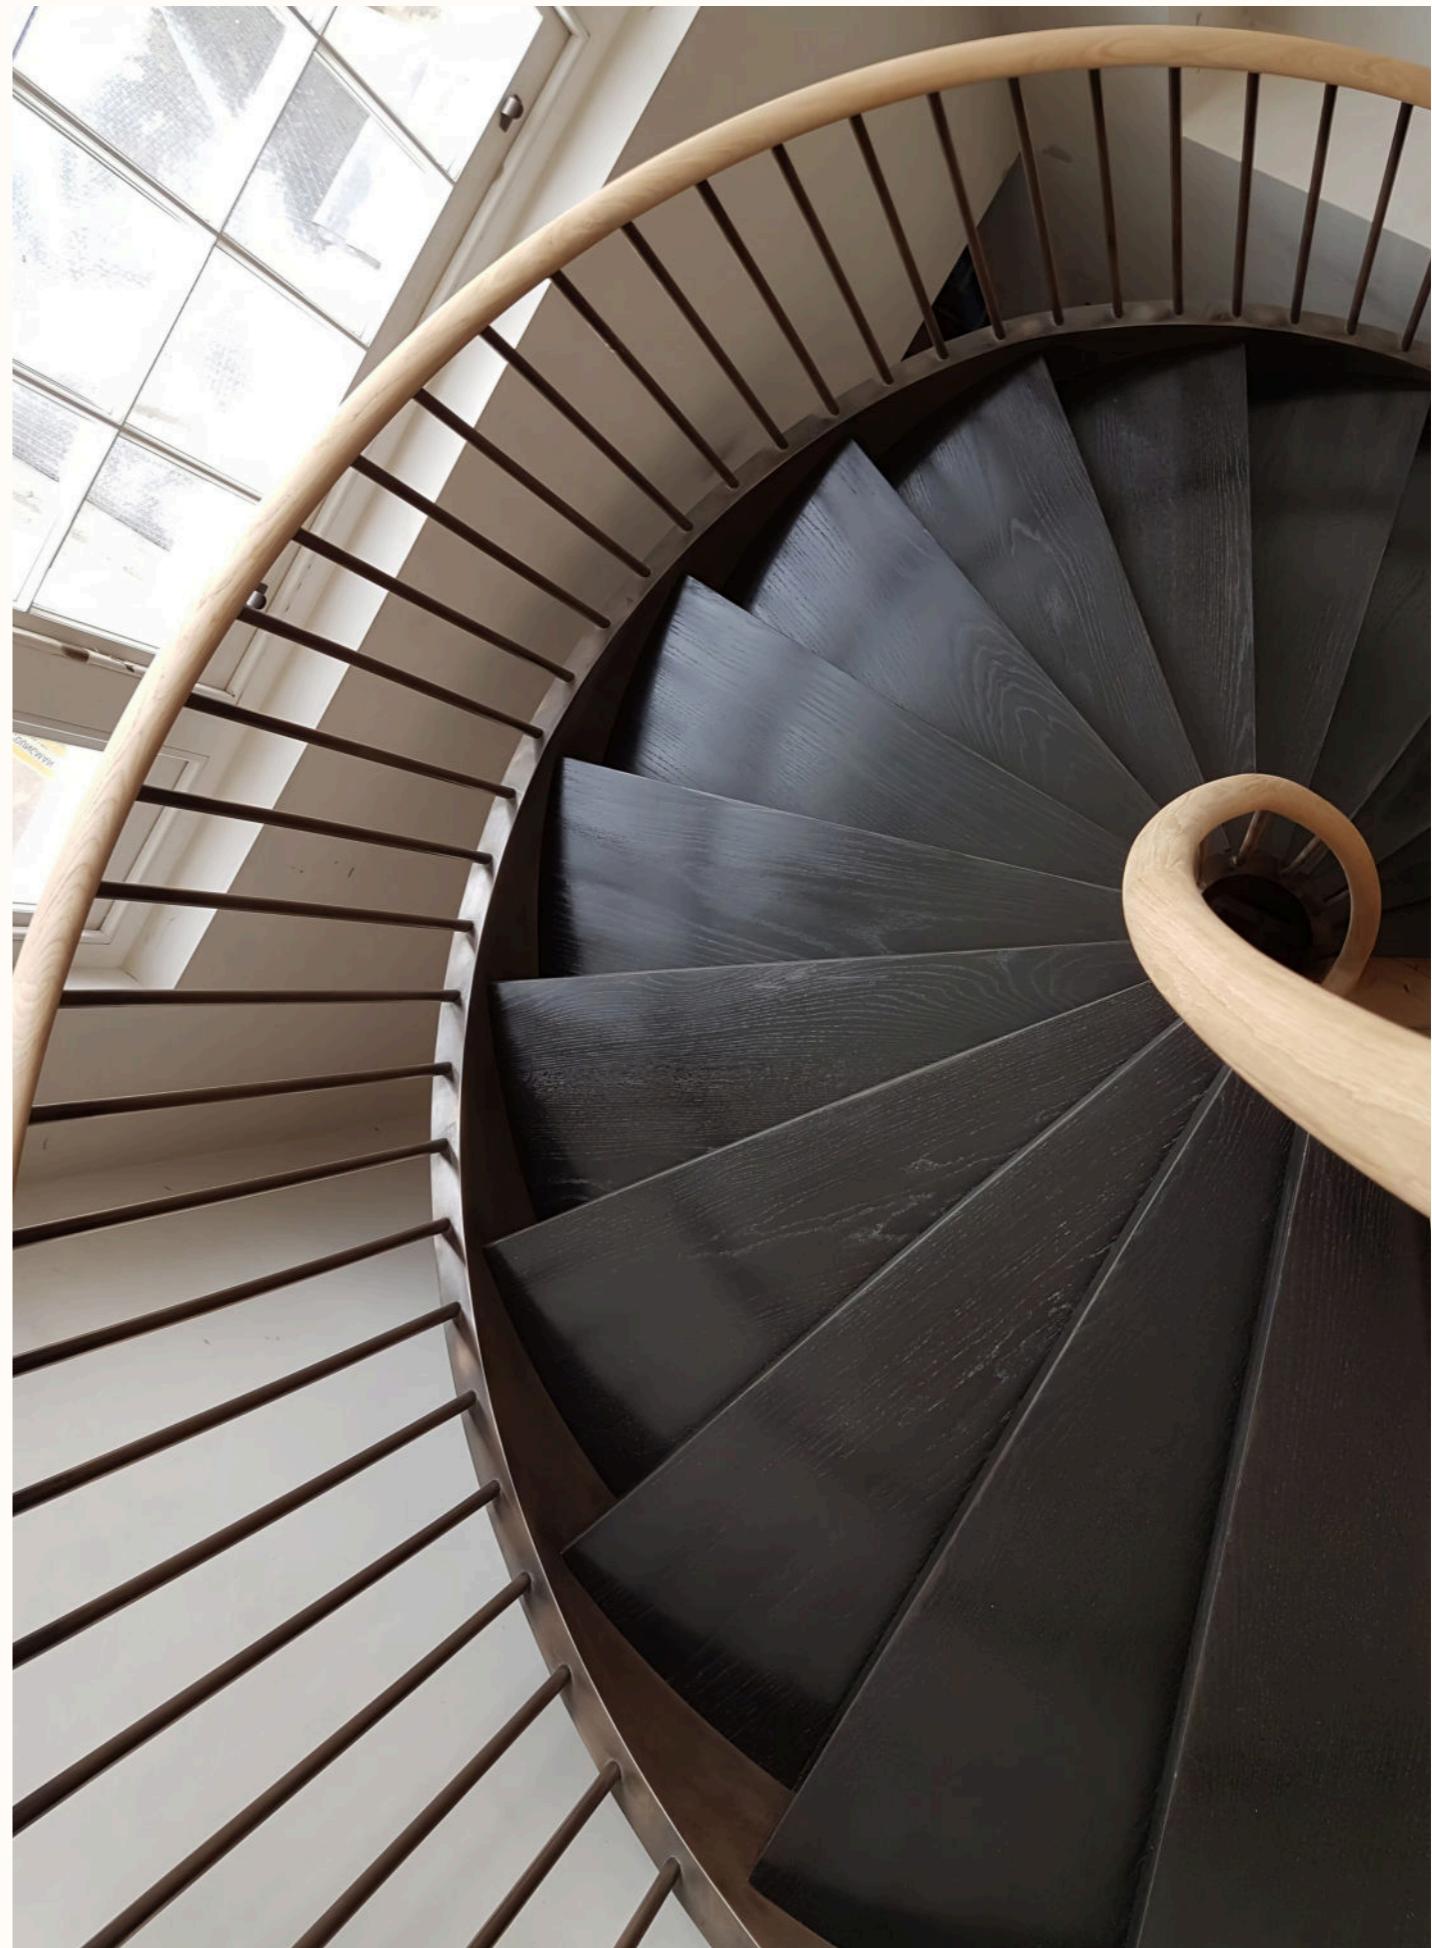

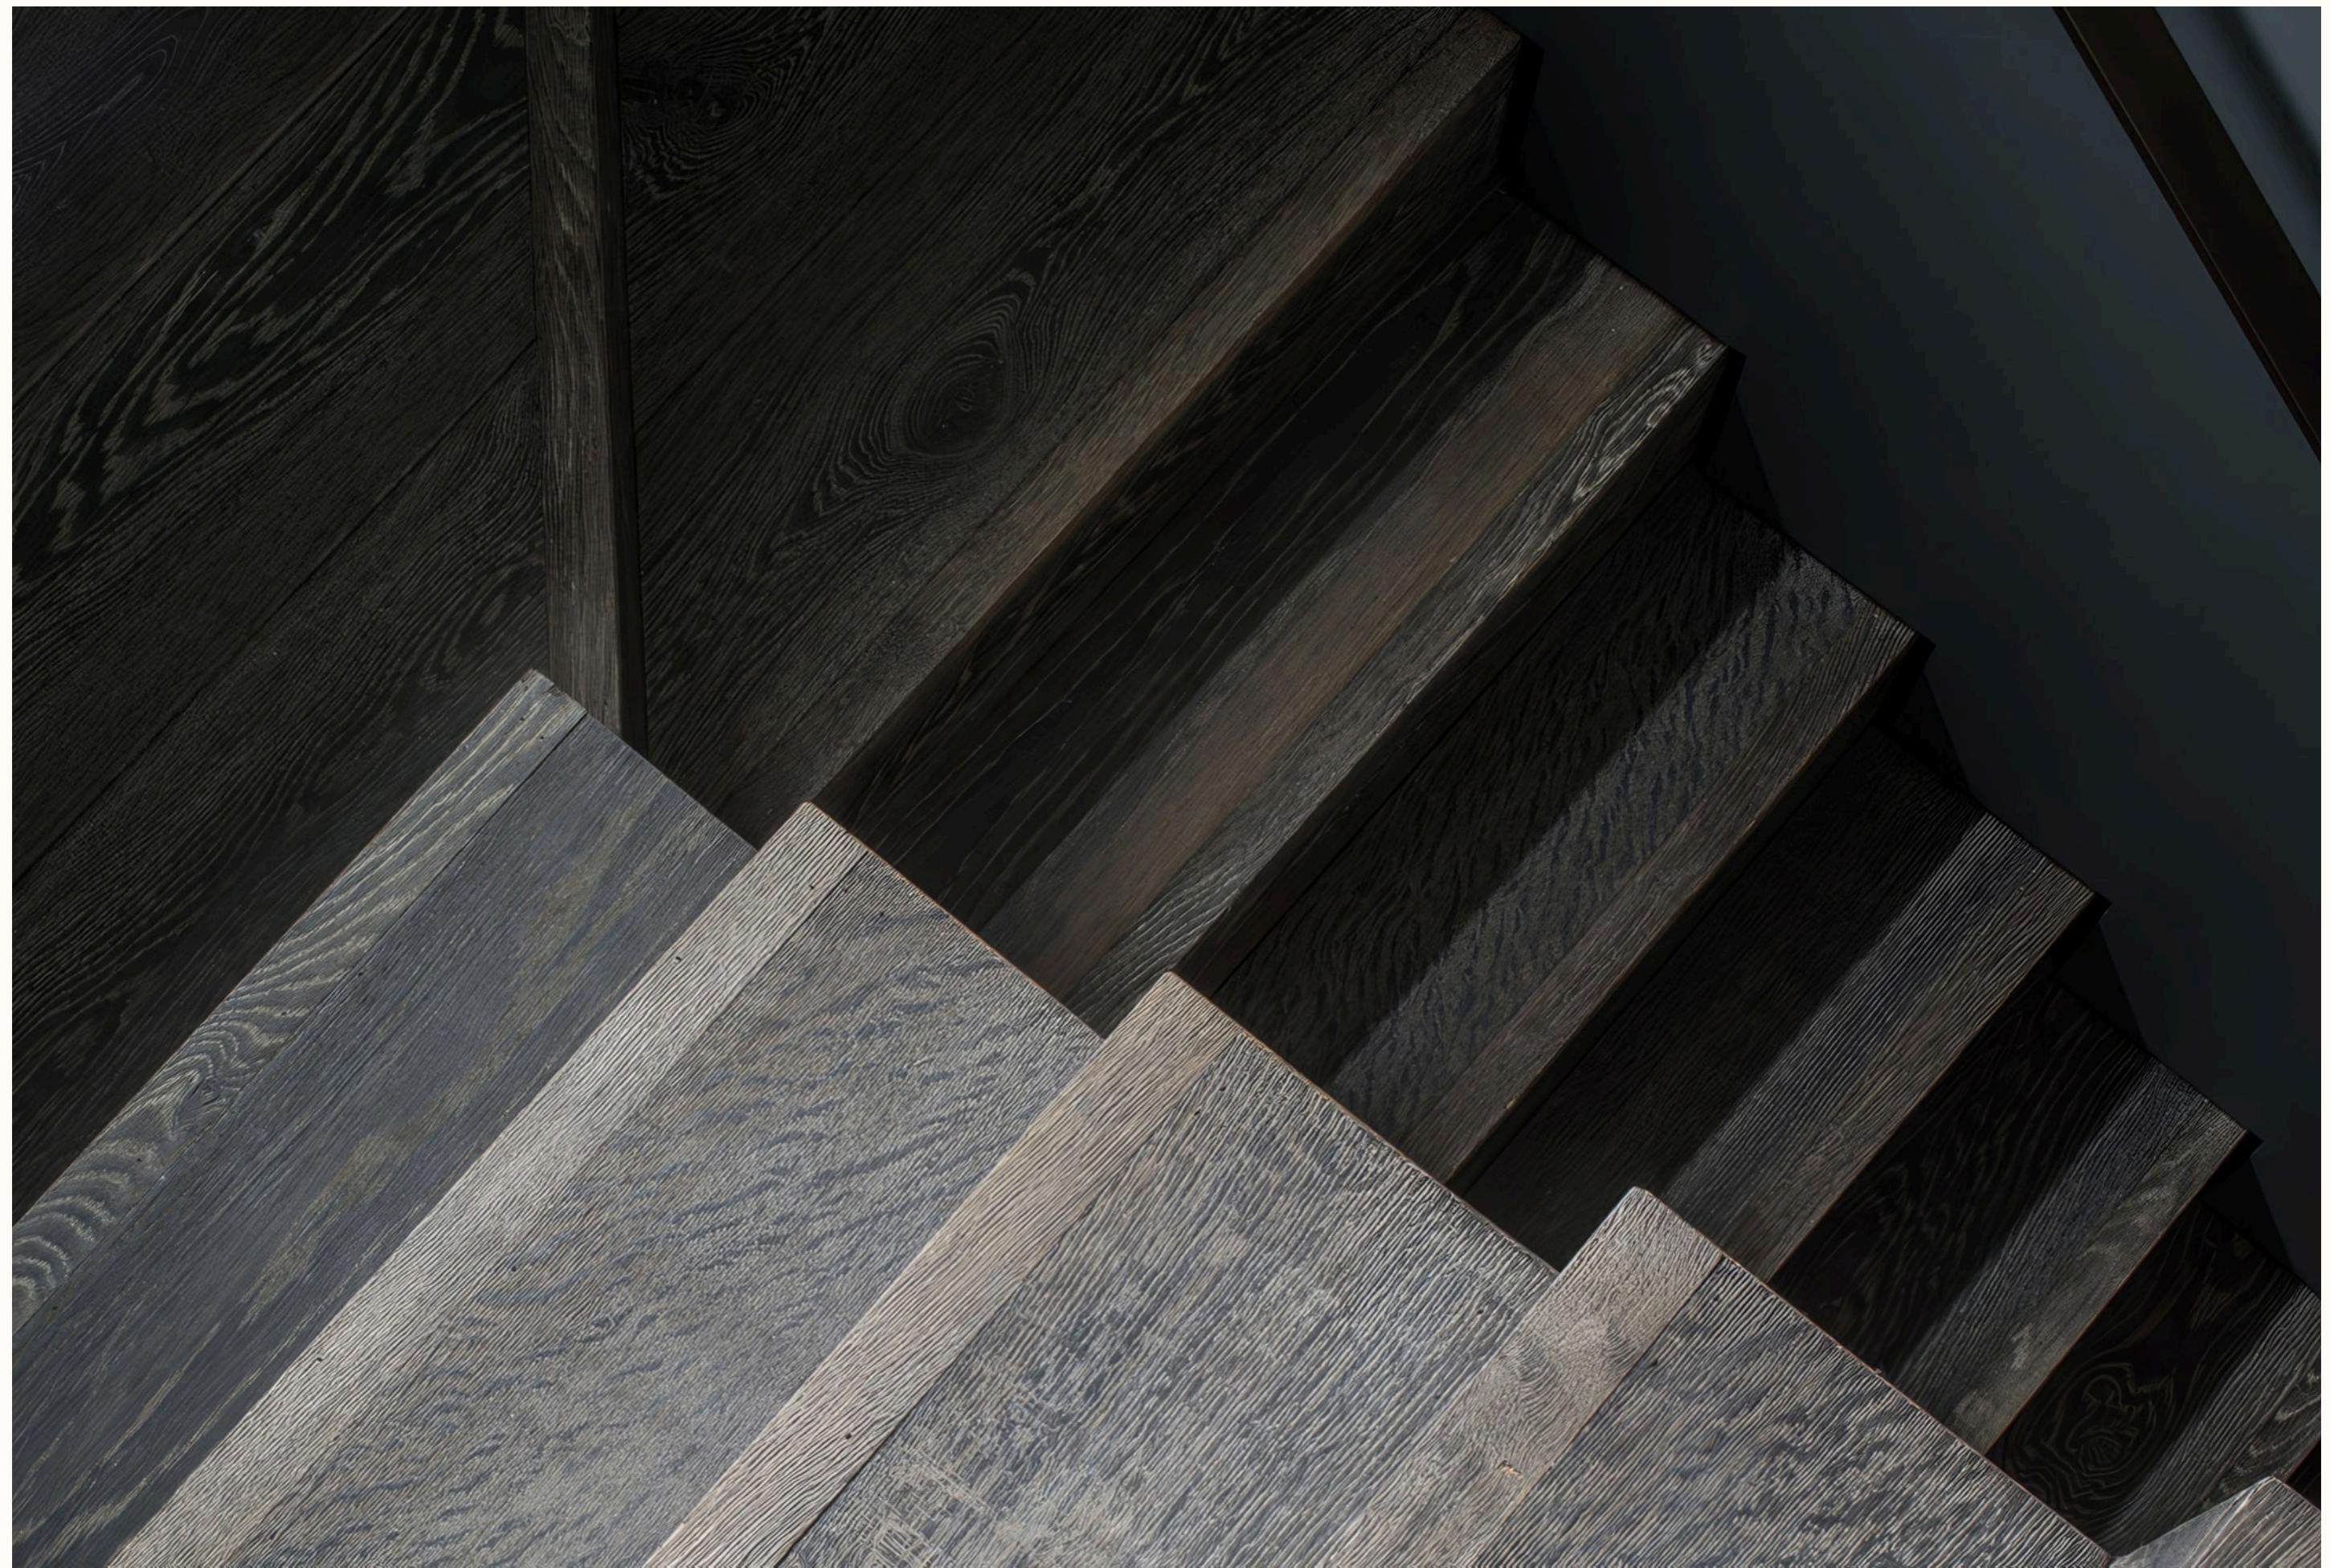

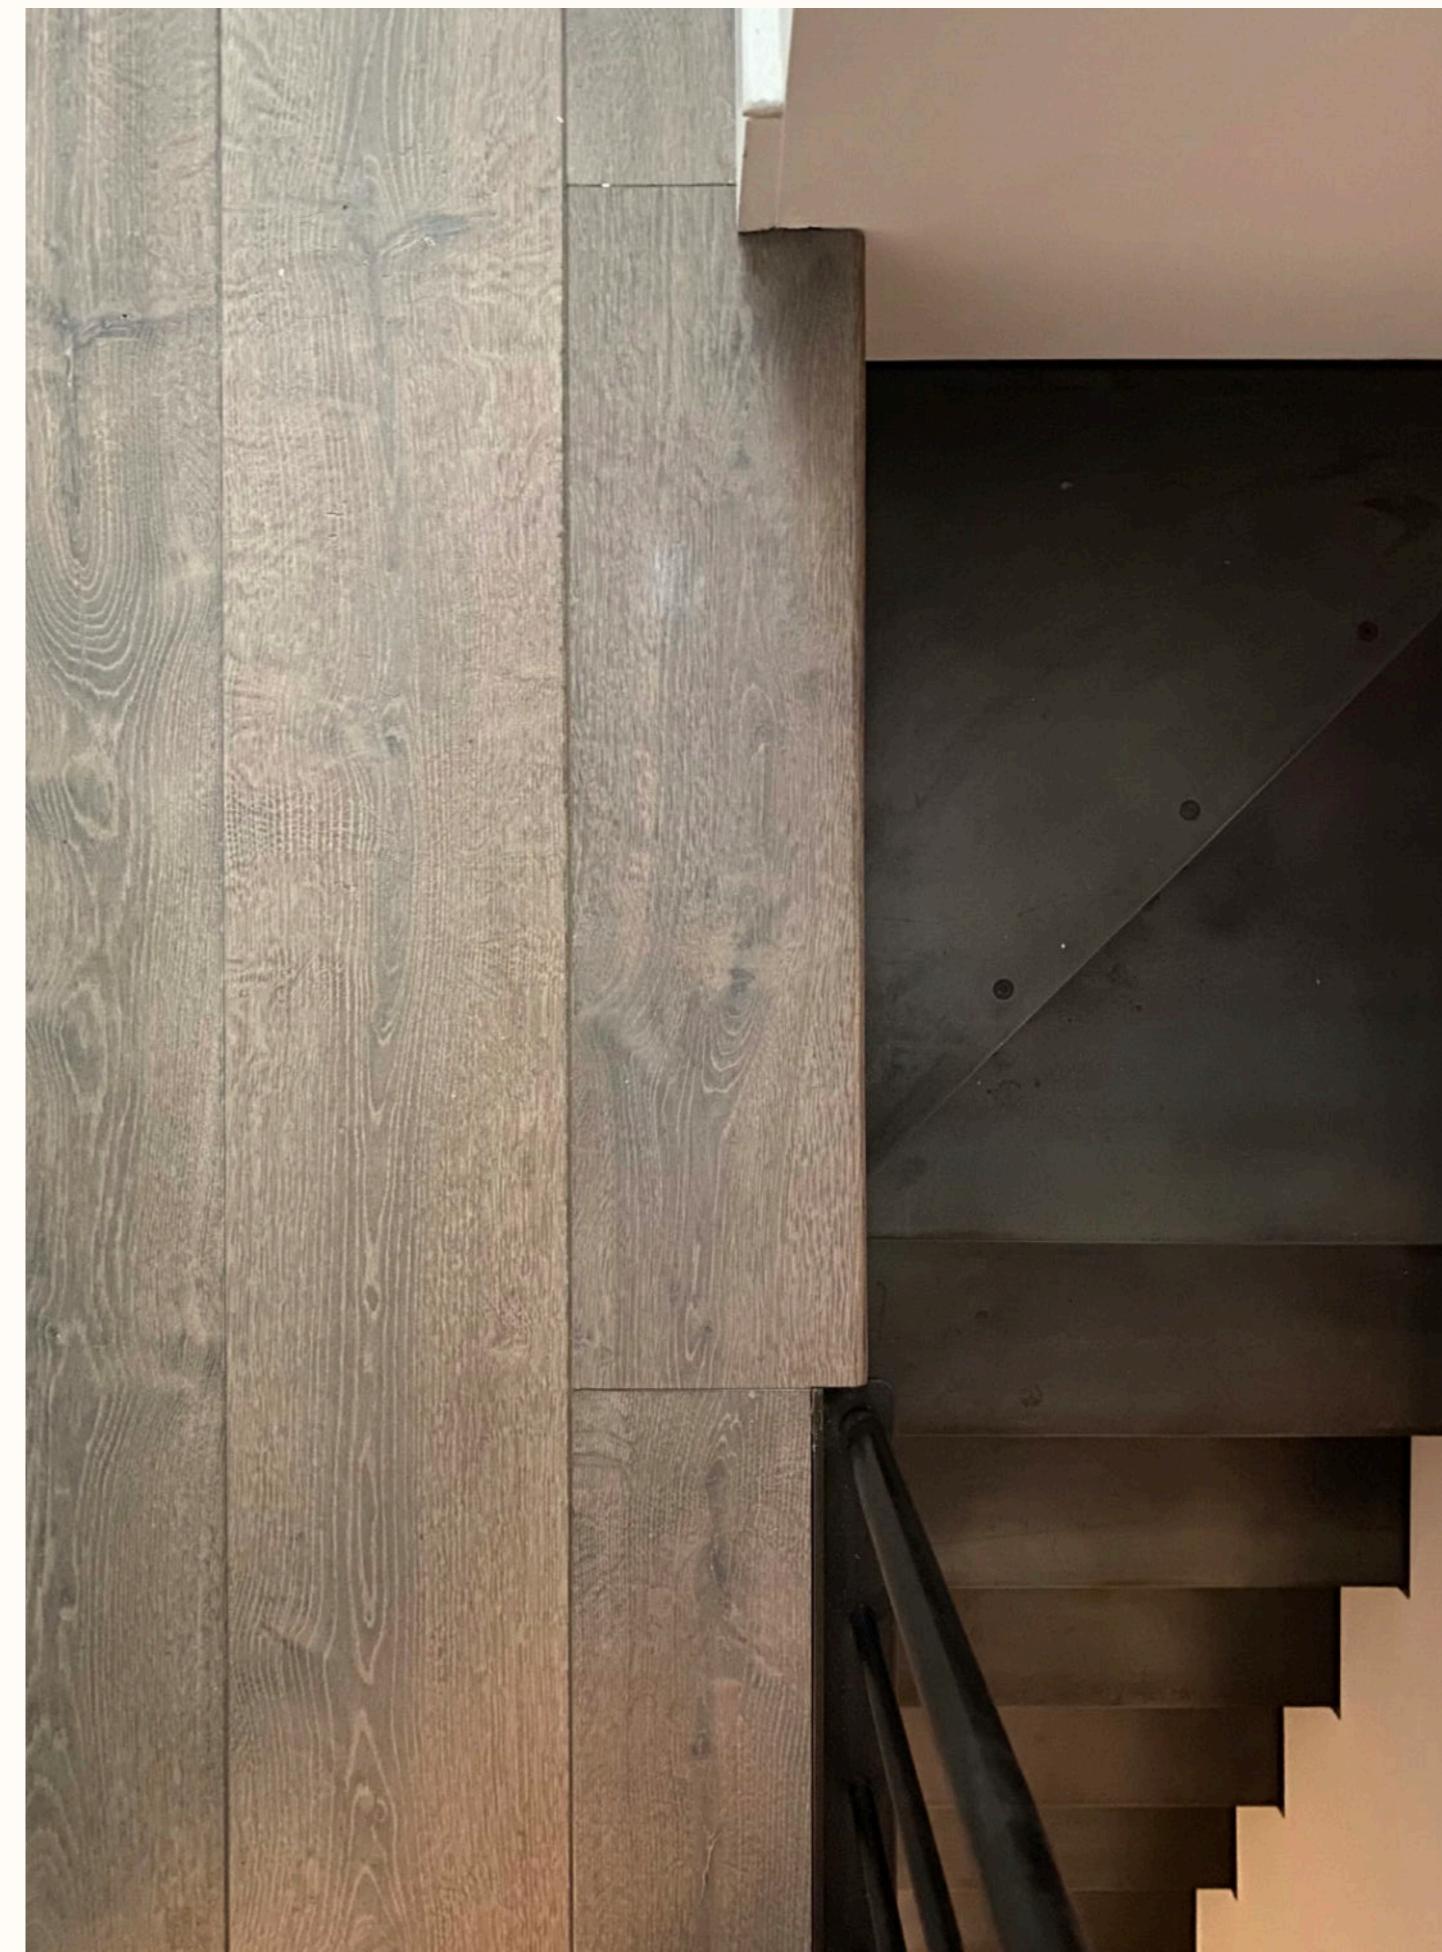

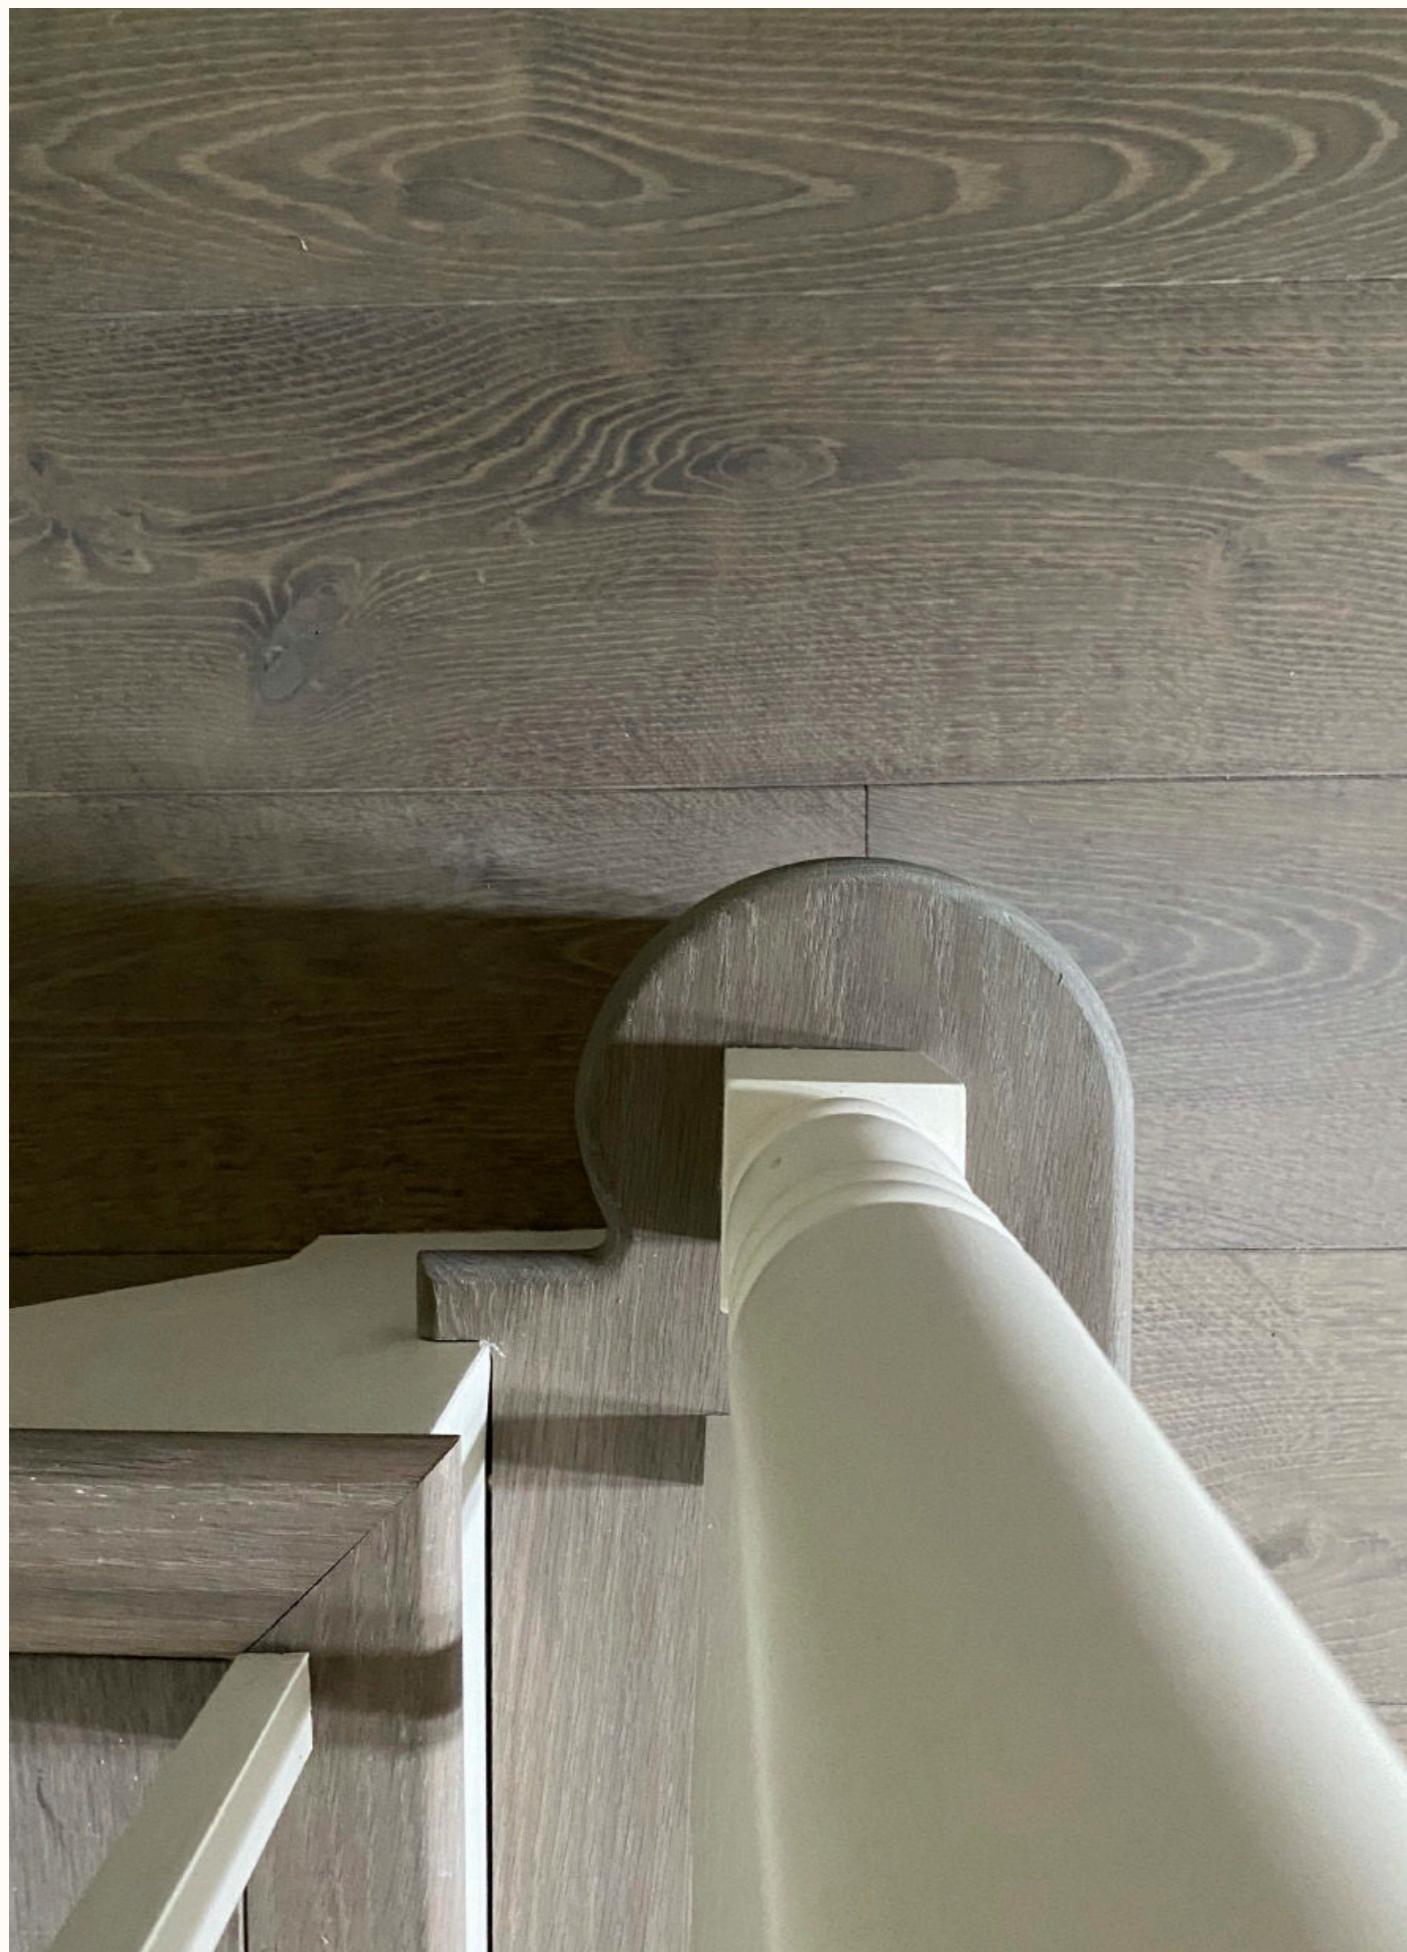

R E : S H A P I N G

Every riser, tread and joint is made to measure and
crafted using a number of techniques.

R E : G E N E R A T I O N

Over the past decade we have planted 25,000 trees
across the UK and North America.

Through the ‘One Tree Planted’ scheme,
we have planted trees for the
Lancashire Wildlife Trust and
Crane Park Island - London Wildlife Trust.

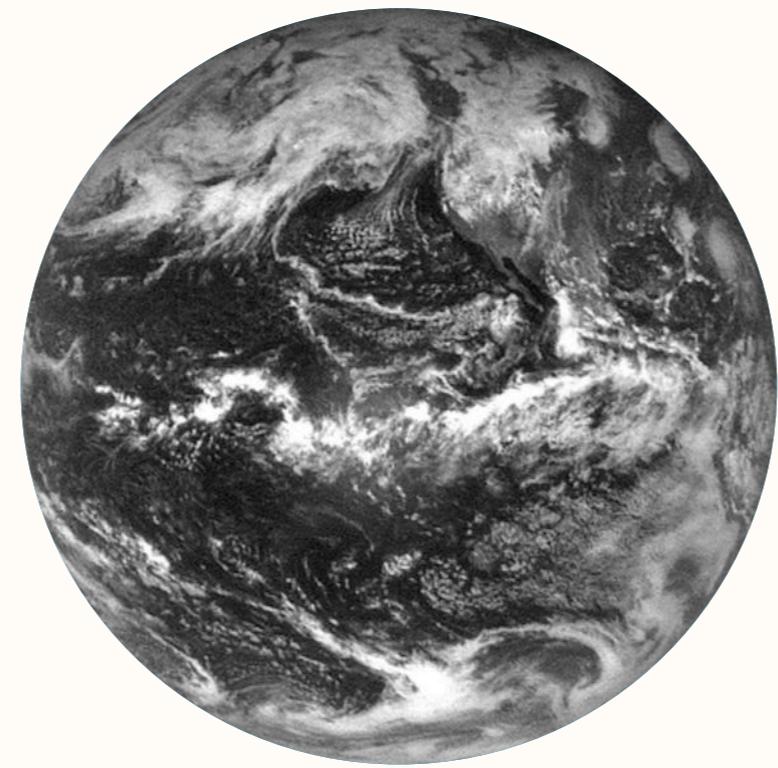

80% of our timber is reclaimed, protecting forests by using existing wood material.
